User Story

WeatherSimple is a web application, that allows users to view changing weather conditions. With weather conditions constantly changing, the website strives to provide a responsive viewing experience on any device. The website will take advantage of larger screen sizes and smaller screen sizes. For users entering the website, there will be a login and signup portion to be able to use the web application. The web application will have a simple but effective user interface. With an effortless design, that allows the user to toggle between light and dark mode. Also, for users experiencing extreme weather conditions weather alerts will be sent out. These alerts will be sent in the form of an email to users. Users will be able to search for weather in specific locations, which can be viewed on a map. Also, have a taskbar on the side displaying convenient information. WeatherSimple provides, a completely seamless user experience for all users across all devices.
